

AMENDMENTS TO THE DRAWINGS

The Examiner has objected to the drawings under 37 C.F.R. § 1.83(a) alleging that the drawings must show every feature of the invention specified in the claims. Applicants are submitting substitute formal drawings with this Response which show a remote control unit. However, as discussed in detail below, Applicants firmly submit that each of the other features listed in the grounds of objection, are clearly shown in the drawings. Therefore, Applicants respectfully request that the objection to the drawings be withdrawn.

The attached replacement sheet of drawings includes the following changes:

In Fig. 2, the feature “remote control unit 25” is added.
